

Area of interest: Health services

- ▶ Scenario 1: Integration of health care services
 - Internet of Things
 - Integration with larger health care infrastructures
 - Home care, emergency medicine, travel, etc.
 - E.g. patient monitoring systems using existing generic standards like MPEG-21
- ▶ Scenario 2: personalized health diary tool for being mobile in Europe
 - Generic interactive, adaptive to the needs, preferences, medical profile of each individual
 - Emphasis on chronic diseases
