

BLED

Content Creation and Media Delivery (3D Internet) Working Group Agenda

I- Welcome and Objectives (Theodore Zahariadis) 10 min

Since the general presentation of the Content Creation and Media Delivery working group will be part of the plenary session "presentation of the BO session" the objective of this opening session is to present to the participants the main objectives of this break out session and its organisation [http://www.future-internet.eu/index.php?id=43&tx_ttnews\[tt_news\]=5&cHash=38fe6a9c16](http://www.future-internet.eu/index.php?id=43&tx_ttnews[tt_news]=5&cHash=38fe6a9c16). It will also offer to participants the opportunity to propose modifications to the organisation of the session.

In this light, the main objective of the session will be to discuss the draft "issues paper" (available on-line, at: http://www.future-internet.eu/fileadmin/documents/bled_documents/Content_BO_session_issue_paper.pdf). At the same time, representatives of the other domains (networks, security, and services) are invited to contribute their views on cross-issues. As a result of the above discussion the issues paper can be adapted, deliverables contributing to solving the issues can be defined, and the format and operational process of the group can be defined.

II- Future Internet Cross Domain Issues (Chair: Theodore Zahariadis, Synelixis) 45 min

- Considerations about the issues paper from the Services group:
 - M. Surridge and M. Boniface, IT Innovation Centre (15')
- Considerations about the issues paper from the Networking group:
 - David Kennedy, Eurescom (15')
- Considerations about the issues paper from the Security group:
 - TBD, (15')

III - Multimedia Content Search (*Nozha Boujema*, *IMEDIA - INRIA*) 15 min
