

# Security, Privacy and Trust in the Future Internet

Conclusions and steps forward

April 2, 2008 9.00 – 12.30

# Conclusions and steps forward

## Our input to the Future Internet Assembly

- Identity management in Future Internet – persons/things etc.....
- Trust – how to define and implement /instantiate it
- Vulnerabilities and threats
- Experimental facilities – in next FIA BO session
- Legislation and economics links with Security
- Requirements for society as a whole

**Use Think-Trust Future Internet WG as a vehicle** to influence the Future Internet Assembly from Security Perspective, Coordinate with other ongoing activities

**Emphasis on the cross-domain priorities** of security, privacy and trust beyond the current Work Programme

**Think-Trust Workshop** planned for Sept , Paris
