

FIREWORKS

FIA Caretakers' meeting

Objectives, agenda

Deploying on FIRE?

FIREWorks
FIA Valencia
22.1.2010

FIREWORKS

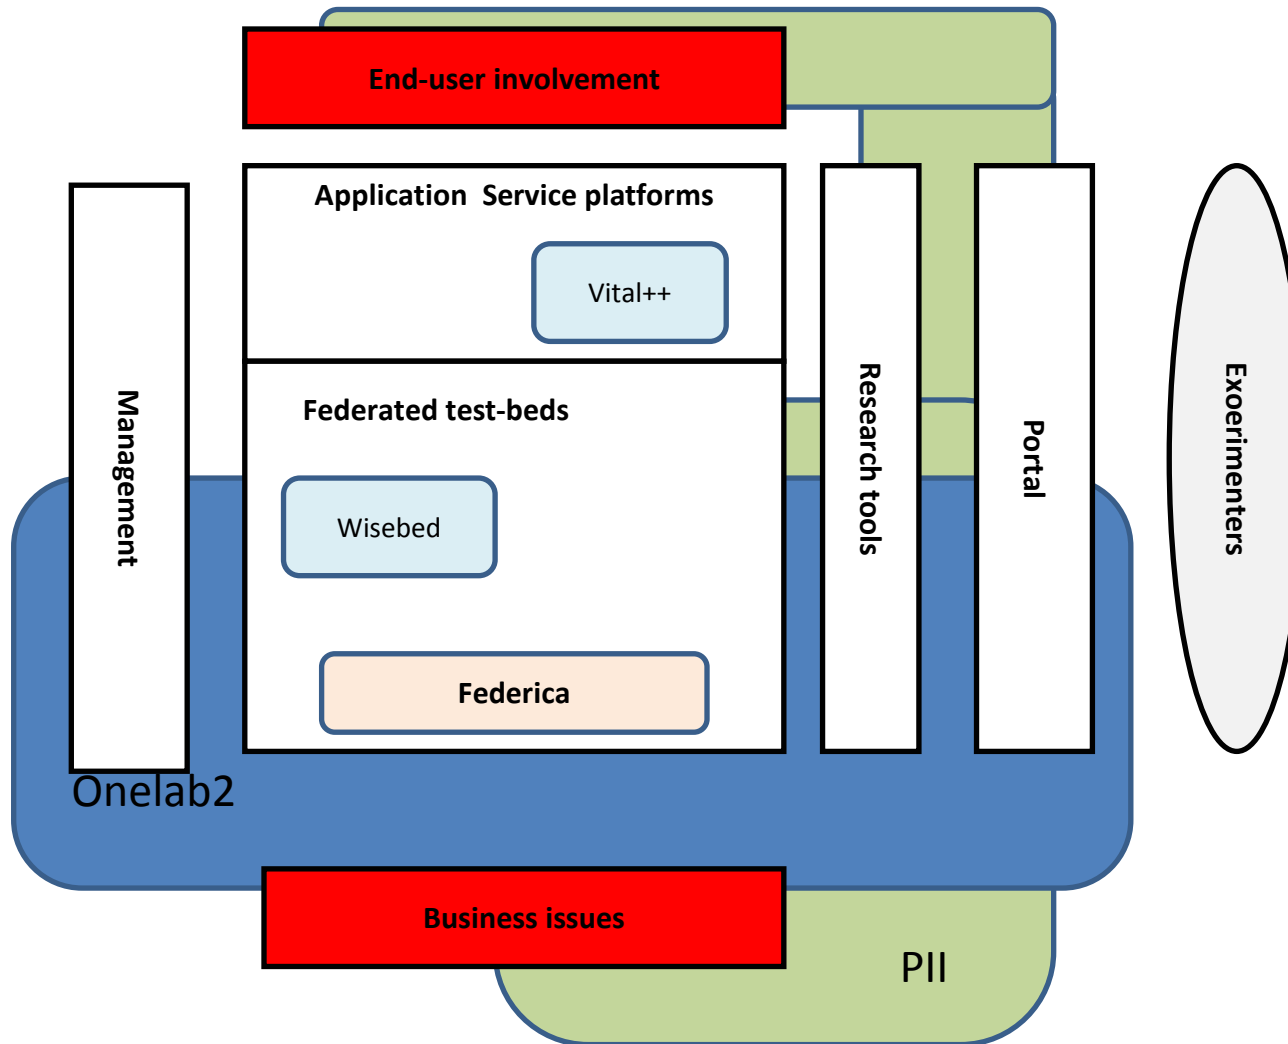

FIRE

- Deploying on Future Internet Research & Experimentation (FIRE)
 - Cross-topic on virtualisation
 - FIRE White Paper on experimentally-driven research
 - International reach
 - Update on international cooperation status of projects involving experimentation
 - NRENs and GEANT
 - Examples of resource usage in projects
 - What and how GEANT-x has to offer
 - Organise cross-project test session?
 - Harmonising plans with new projects (call4 – customers, call5 – providers and customers)

FIREWORKS

FIRE Architecture 2.0

FIREWORKS

Objectives

- Support experimentation in the FI PPP
 - Virtualization
 - Brokerage
 - ...
- Building environments
 - Provisioning of platforms
- Running experiments
 - Library of standard experiments?

Conference invitation

TridentCom 2010, Berlin,
18-20 May 2010

www.tridentcom.org

The screenshot shows the TridentCom 2010 website in a Mozilla Firefox browser window. The browser's address bar displays the URL <http://www.tridentcom.org/>. The website's main header features the title "TridentCom 2010" in a large blue font, with the subtitle "The 6th International Conference on Testbeds and Research Infrastructures for the Development of Networks & Communities" to its right. Below the title, the dates "18-20 May 2010 - Berlin, Germany" and the ICST logo are visible. A central banner image shows various Berlin landmarks, including the Brandenburg Gate and the TV Tower. Below the banner, the text "18-20 May 2010 - Berlin, Germany" and "Extended deadline for papers 29 November 2009" is displayed. The left sidebar contains a "Technical sponsorship" section with logos for VITAL++, WISEBED, and CEITIC. Below this is a "General" section with links for Home, Important Dates, Conference Committees, Sponsors, Contacts, and Registration. The "Calls" section includes links for Call for Papers, Call for Workshops, Call for Tutorials, and Call for Participation. The "Authors" section has links for Submission Guidelines and Authors' Instructions. The main content area on the right is titled "Scope" and contains a detailed paragraph about the convergence of networks and services in Information and Communications Technologies, the need for flexible testing environments, and the role of testbeds and experimental facilities in the future Internet.

FIREWORKS

Agenda

- Library of experiments?
- PPP
- Standard: common language
 - Description of results
 - One shop
- Methodologies
 1. Panels
 2. Working groups
