

# Preparation meeting FIA Valencia

Brussels, 22<sup>nd</sup> January 2010

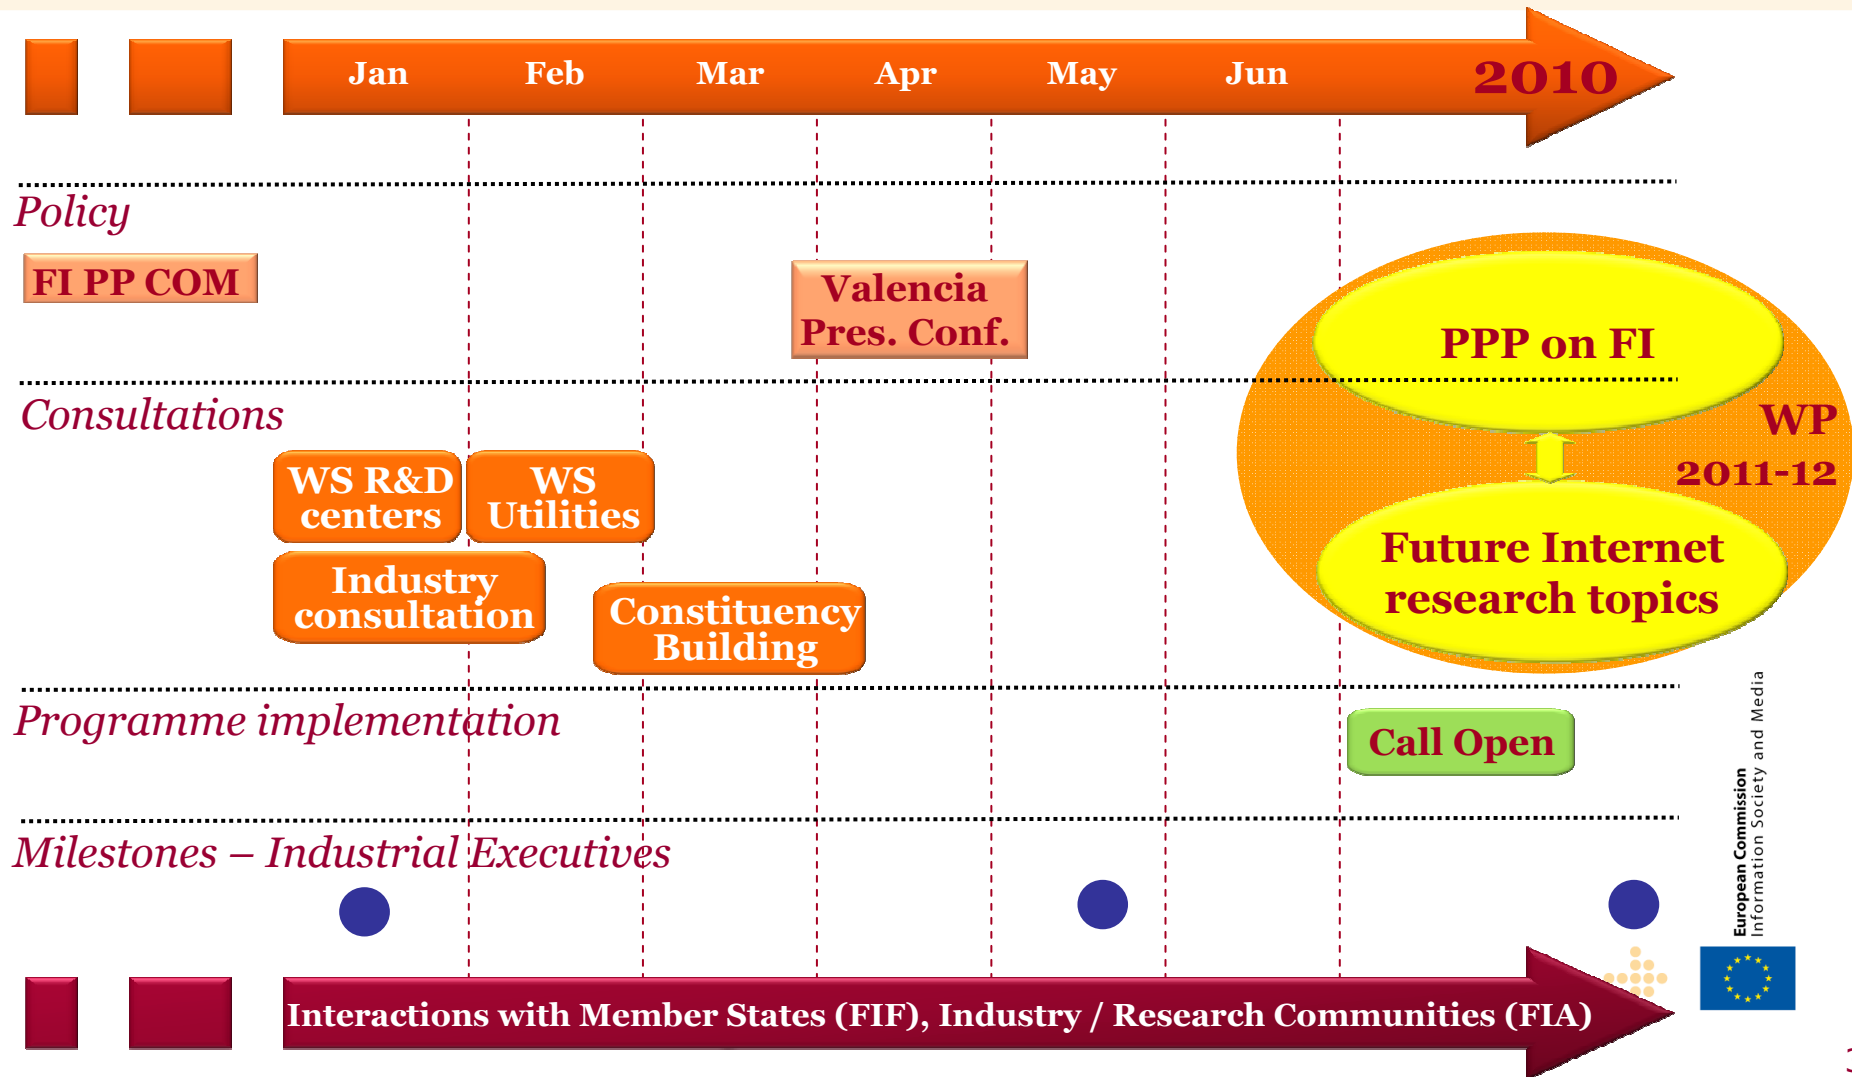

European Commission  
Information Society and Media

# Agenda

- Welcome and Update on FI activities
- FIA Valencia: Agenda and issues
- FIA Book
- Overview of all sessions in FIA Valencia
- Conclusions and actions

# Timeline for the FI PPP

# FIA Valencia: agenda

- Draft Agenda similar to Stockholm, but 2 observations:
  - Topics are OK, but we tend to get same people talk about different topics, difficult to involve all FIA projects
  - “Group” sessions are not always adding value, and participants seem less interested to join them

# FIA Valencia: agenda

- **Suggestions:**
  - Alternative for Friday: trying to invoke more discussion by including debates between different sessions
    - Economy of information vs. what does FI mean for enterprise?
    - FI Reference model vs Trust and provenance
    - Concrete results of architectures vs Discovery and search
    - FI for smart energy vs FI for smart health vs FI for smart cities
    - How to move to Standardisation vs Deploying on FIRE
  - Or one big panel with all session leaders?
  - For each session: Invite people that have tangible experience with the topic discussed, have max. 1 speaker that has spoken at previous FIA's, have people that have opposing opinions
  - EC will send out call for participation to possible FIA participants asking for presentations of their tangible results related to a session

# Other issues

- Website: [www.future-internet.eu](http://www.future-internet.eu) or [www.fi-valencia.eu](http://www.fi-valencia.eu)
- Additional topic: Provisioning of Virtual Networks and Service Computing Clouds?
- FI Tournament
- FIA Gent 16/17 December
