

The Future Media Internet coordination action

Towards standardisation of Future Internet Architecture

a new ETSI Industry Specification Group (ISG)

Prof. Guillermo Cisneros / Prof. Ebroul Izquierdo
Technical University of Madrid / QMUL

Objective

**Description of a standardised
reference model and building
components of Future Internet
Architecture**

Scope

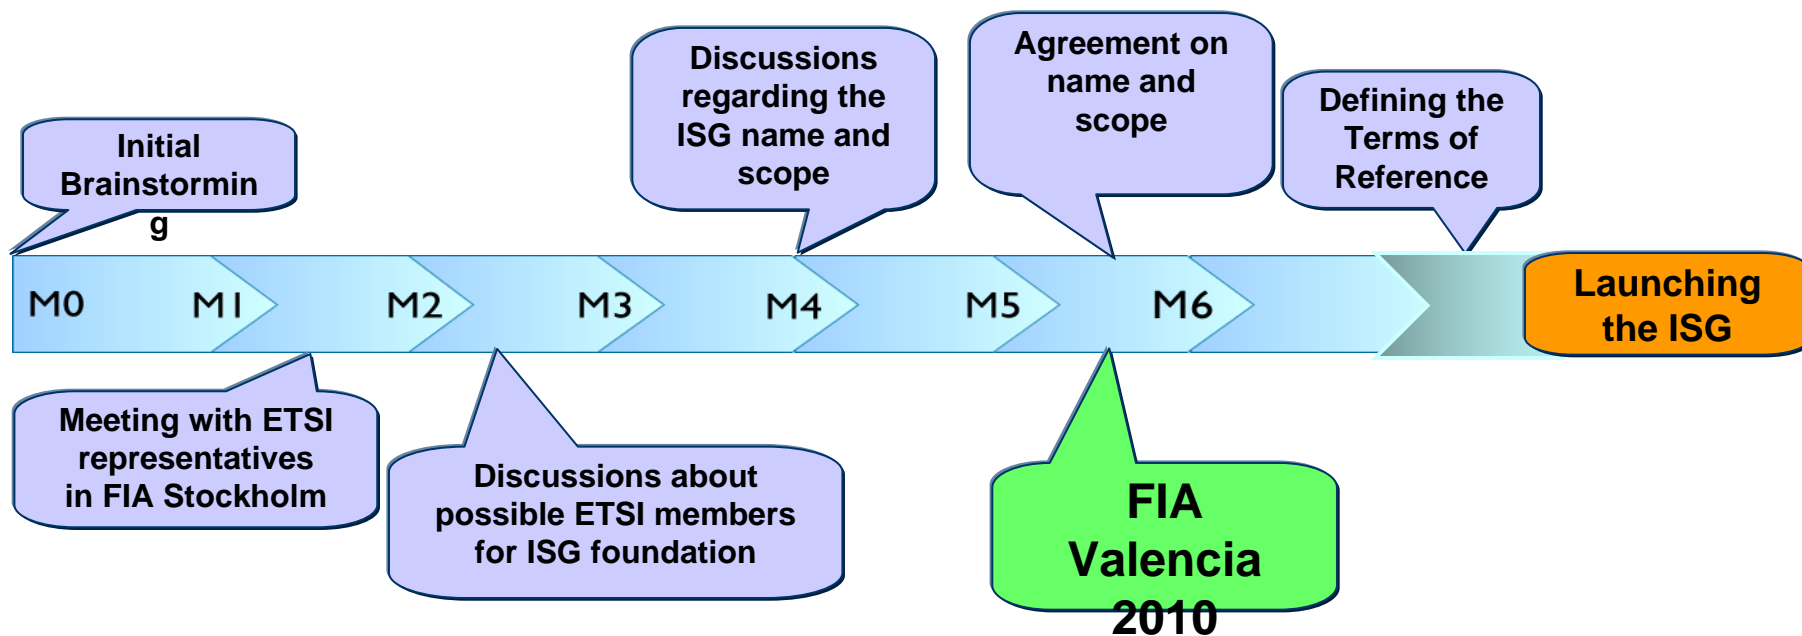

- To describe the requirements for FI Architecture(s)
- To specify the reference model for FI Architecture(s)

Limitations

The ISG FIA (Future Internet Architecture) shall not:

- Define business models for Future Internet Architectures
- Specify ontologies and semantics (tbd by experts in semantics)

Roadmap

What do you think?

Input from FIA projects and ETSI
members are welcome

You are invited to participate!

... now we want to hear your opinions!!!

Thank you!!
